

GROUPCYTEK

Job Description

Date: January 2012

Vacancy Details

Reference: SE1204

Vacancy: GroupCytek, an independent Automation company delivering Automation Consultancy and Projects to the process industries, is seeking to further expand the team with the addition of experienced Senior Systems Engineers. This is a significant opportunity to join an Automation Company delivering Automation, Consultancy and Projects to the Process Industries.

Job Title: Senior Systems Engineer

Qualifications: Degree or equivalent experience

Job Description: As a Systems Engineer you will need experience of the Specification, Design, Implementation and construction/commissioning phase of projects in the Oil and Gas and Chemical processing industries. The role will require experience in one or more of the following areas: -

- Full Project Life Cycle including the development of Functional and Design Specifications, Control Aspects and Cause and Effect Charts
- Implementation, including programming and configuration of DCS systems
- Works testing (FAT), commissioning and site support
- Interfacing with and managing the delivery of sub-contractors and package plant suppliers

Industry experience must include all of the following:

- Oil and Gas and Chemical Process Plant
- Distributed Control Systems

All work to be carried out to applicable quality standards.

Skill Set: Experience of the Honeywell Experion and the Honeywell TDC3000 Series Systems including the requisite engineering tools is essential.
Knowledge of the Honeywell FSC would also be an advantage.

Position Type: Permanent/Contract

The Company: GroupCytek Ltd is an established, successful platform independent Engineering Services and Projects focused Automation Company, delivering solutions to the Process, Manufacturing and Transportation industries throughout the UK, Europe, the Middle and Far East. Our focus is to add value to our Customer's automation activity. We require high calibre individuals to deliver our automation offering which includes DCS, SCADA and PLC platforms. GroupCytek's customer base includes End-Users, EPCs and the OEMs.

Working Location: This project is located in Yorkshire, England.

Remuneration: Commensurate with experience.
