

# GROUPCYTEK

## Job Description

Date: Jan 2012

**Reference: SnrAutoEng 1203A**

Vacancy Details:

**Vacancy:** GroupCytek, an independent Automation company delivering Automation, Consultancy and Projects to the process industries, is seeking to build on its success and further expand the team with the addition of an experienced Senior Automation Engineer. This is an exciting opportunity to develop your career by gaining experience working in an EPC environment.

**Job Title:** Senior Automation Engineer – Chlor, Alkali, Brine, ESS and HCU

**Qualifications:** HND/C essential Degree preferred along with relevant industry experience

**Job Description:** As a Senior Automation Engineer you will need the following essential experience:

- At least 10 years Automation Engineering, much of which must have been spent in a Process Control or EPC Contractor environment carrying out Specification, Development, Testing and Commissioning activities

Proven experience in:

- Preparation of Control System Deliverables in line with project requirements
- Development of Packaged Unit Control & Automation specifications and schedules
- Preparation of Functional and Detailed Design Specifications (FDS/SDS) for complex control systems using S88, including the development of complex control strategies
- Management of Control System and Package Vendors through design, FAT, installation and commissioning
- Interfacing with End User and Control Systems Vendor to identify and resolve technical queries
- Commercial and Schedule awareness and an understanding of management of change and change control

Ability to work as part of a multi-skilled Engineering team on a large project working directly for the Lead Engineer, with a good understanding of the use of commonality and standards to deliver a ‘common look and feel’ control system.

Design Tools to be used include Client Standards, SPI (INtools) and Microsoft Access. All work to be carried out to applicable quality standards. Previous experience of Middle East projects are an advantage.

**Position Type:** Permanent, 2 positions.

**The Company:** GroupCytek Ltd is an established, successful platform independent Engineering Services and Projects focused Automation Company, delivering automation solutions to the Process, Manufacturing and Transportation industries throughout the UK, Europe, the Middle and Far East. Our focus is to add value to our Customer’s automation activity. We require high calibre individuals to deliver our automation offering which includes DCS, SCADA and PLC platforms. GroupCytek’s customer base includes End-Users, EPC’s and the OEM’s.

**Working Location** UK

**Remuneration** Up to £40,000

**NO AGENCIES**
